

# Portfolio Project

Pay close attention, we are now starting our:

# Deep dive into our Session.

# Portfolio Project.

alx

- A project you build to showcase what you've learnt over the first 9 months.
- Can be done in teams upto a maximum number of 3.
- The whole project is going to be broken down into several parts
  - Research and Project Approval (3 weeks)
  - Built your Portfolio Project (3 weeks)
  - Blog Post and Clean up

# Research Bit

alx

- Form teams.
- Come up with an idea and document it.
  - If you are unable to come up with something there is a default project provided by ALX that you can do.
- Come up with an MVP
  - After researching you come up with what you'll build for your MVP.
- Do a lot of planning
  - Come up with trello/jira boards showing how you'll work for the next few weeks.

# Building Bit

alx

- Start Building
  - Make revisions if needed on objectives.
- Complete your MVP
  - Try to meet all of your objectives
  - Make sure to track your progress it helps make you accountable
- Build a landing page for your project
  - What's a landing page
- Present your project to Mentors or former students
  - Make slides
  - Show us your codebase
  - Do a demo for us (Very important)

# Post Project

- Write a Blog about the whole process of building the project.
  - Useful to document our experience
- Clean up your github.
  - Work on Readme and documentation.

# Resources you can use

- Github students
- Other online free tiers of services
  - Vercel, Netlify, PythonAnywhere(for flask), AWS (Be very careful).

# Important Notes

- You'll work with the same partners until the final portfolio project.
- You need to work on a new project. Don't present a project you did a long time ago. That's not allowed.
- The final portfolio project presentation review must be done on a call to either a mentor or senior learners (we'll tell you how when we get there)
